OBJECTIVE

Cybersecurity Analyst with hands-on SOC experience in SIEM monitoring, incident triage, phishing analysis, and vulnerability assessment. Background in both technical security operations and compliance from a law degree, seeking to contribute to a SOC team with a strong purple team mindset.

EXPERIENCE

Cybersecurity Researcher

Cairo 09/2024 – Present

BugBounty Researcher | Remote

Responsibilities:

- Performed vulnerability research on public bug bounty programs.
- Reported findings following responsible disclosure practices.
- Ability to think like an attacker to identify, exploit, and remediate, security gaps.
- Validated security issues including IDOR, Information Disclosure, and Access Control vulnerabilities.

Technical Support

Riyadh | 9 / 2025 – 5 / 2026

Mulem Company | Hybrid Full time

Responsibilities:

- Set up, configure, and upgrade new computer hardware, software packages, and applications.
- Perform routine daily/weekly data backup procedures to ensure business continuity.
- Identify and resolve hardware, software, network, and peripheral device problems.

Cybersecurity Intern

4 / 2025 – 7 / 2025

Cairo, Egypt

- Conducted web application security assessments in controlled lab and training environments, identifying critical vulnerabilities including SQL Injection and XSS.
- Performed network vulnerability assessments using Nmap and Nessus, documenting findings in detailed client-ready reports in both Arabic and English.
- Assisted senior pentesters with Active Directory enumeration and privilege escalation simulations in lab environments.

GRC

Yahia Habib Law Firm

Cairo | 11 / 2021 – 3 / 2025

Responsibilities:

- Conducted legal research related to technology law, data protection, compliance, and risk management.
 - Supported compliance and governance tasks aligned with information security frameworks such as ISO 27001 and general risk management principles.
 - Reviewed and drafted legal and compliance documents with focus on data protection, confidentiality, and risk mitigation.
 - Analyzed regulatory requirements affecting organizations' information security and operational risk.
-

Projects & Labs

SIEM Monitoring & Alert Triage Lab

Description

- Built a SOC-style monitoring environment using Wazuh and Splunk.

Achievements

- Monitored security alerts generated from Windows and Linux systems using a SIEM solution (Wazuh / Splunk).
- Analyzed authentication, system, and network logs to identify suspicious activities such as multiple failed login

attempts and abnormal access patterns.

- Classified alerts by severity (Low, Medium, High) and identified false positives.
- Investigated confirmed alerts and escalated potential security incidents according to SOC procedures.
- Documented alert analysis and actions taken in structured incident notes.

Tools & Technologies

- SIEM (Wazuh / Splunk)
- Windows Event Logs, Linux auth logs
- Wireshark, basic network analysis

Phishing Detection, Analysis & User-Reported Incident Handling

Description

Performed end-to-end analysis and handling of phishing incidents as part of a simulated SOC workflow, focusing on detection, investigation, containment, and documentation of malicious emails.

Achievements

- Analyzed user-reported phishing emails to determine malicious intent using email header analysis, URL inspection, and attachment evaluation.
- Identified common phishing techniques including credential harvesting, spoofed domains, and malicious attachments.
- Classified phishing incidents based on risk level and potential business impact.
- Recommended containment actions such as blocking malicious domains, resetting compromised credentials, and user awareness escalation.
- Documented phishing incidents with detailed analysis, findings, and remediation steps following SOC reporting standards.
- Supported continuous improvement by identifying phishing trends and common attack patterns.

Tools & Technologies

- Email headers analysis tools
- VirusTotal, URL reputation services
- SIEM (email and security alerts correlation)
- Browser sandbox / detonation environments
- Threat intelligence feeds
- Windows Event Logs, Linux auth logs

SKILLS

Operating Systems

Windows
Linux

Scripting

PowerShell (Advanced)
Bash (Intermediate)

Programming

- Python (Intermediate)
- JavaScript (Advanced) TypeScript (Intermediate)
- Java, C++ (Basics)

SIEM & EDR Tools

Splunk
Wazuh
ELK
CrowdStrike

Database

SQL:Postgresql, **Nosql:**(Mongodb)

EDUCATION

Cairo University

Bachelor (L.L.B)

Cairo, Egypt (2017,2021)

CERTIFICATES

ISC2 (CC)

CCNA

CompTIA Security+

Language

Arabic

English
